## COMPANY OVERVIEW

Established in 1995, Lion Rubber Industries Pvt Ltd is a leading manufacturer of Rubber Fenders and a wide range of Rubber Products based in Mumbai, India. We specialize in providing innovative solutions for Ship and Port building, Maritime Infrastructure, Hydropower, and Construction sectors. Our focus on customer satisfaction drives us to be the first choice for customized Fender solutions, backed by cutting-edge engineering, certified testing, and competitive pricing.

### Quality Manufacturing Standards:

We employ the latest elastomeric techniques in Molding and Extrusion to manufacture our products, ensuring they meet ISO 9001:2015 and PIANC guidelines for optimal performance and reliability.

### Expansion and Innovation:

Our continual growth includes the acquisition of advanced facilities for developing Dam Gate Rubber Seals, earning a reputation for excellence both in India and internationally.

### Dock Bumpers and Beyond:

Our Dock Bumpers are designed

for use at loading docks in Warehouses, Logistic Parks, and CFSs, offering protection and durability in demanding environments, ensuring safety and efficiency across various sectors.

### Logistics Excellence:

We provide door-to-door delivery logistics via one of our associated companies, operating on a DAP/DDU basis, ensuring the best prices and on-time deliveries, making us the ideal partner for your logistics needs.

# MARINE FENDERS

## Durable Construction:

Our marine fenders are made from premium-grade rubber, ensuring exceptional strength and resilience. They are designed to absorb heavy impacts and reduce wear and tear on both ships and docks.

## Customizable Designs:

Lion Rubber offers a variety of fender types, including Cone, Cell, Element, Cylindrical, Square, and Arch-shaped etc. that can be tailored to meet specific requirements. Whether for small boats or large vessels, we provide solutions that fit your operational needs.

## Enhanced Shock Absorption:

Our advanced rubber formulations deliver superior energy absorption and resilience, making docking and mooring processes safer and more efficient.

## Cost-Effective Protection:

With their durability and extended lifespan, our marine fender systems reduce the need for frequent replacements, helping you save on maintenance costs and downtime.

## **Superior Impact Protection:**

Lion Rubber Floating Fenders absorb high-energy impacts, safeguarding vessels and docks during docking operations.

## **Durability and Longevity:**

Constructed from durable, buoyant materials, these fenders resist UV rays, saltwater, and extreme weather conditions.

## **Customizable Solutions:**

Available in various sizes and configurations, our fenders can be tailored to meet specific needs for any marine application.

## **Offshore Fenders:**

Our range of fenders, including Rub Strip, Shock Cell, Rotating Bumper ring, offers superior impact absorption and protection for offshore platforms, ensuring safe mooring and docking.

## **Rubber Bumpers & Protection:**

Designed to prevent damage to infrastructure and vessels, our rubber bumpers and protective barriers are built to withstand high-energy impacts in offshore operations.

## **Custom Solutions:**

Understanding that each client has unique operational demands, Lion Rubber is dedicated to providing customized offshore solutions. We work collaboratively with our clients to develop tailored fenders that come in a variety of sizes, shapes, and materials. This personalized approach guarantees maximum performance and alignment with specific operational requirements. Whether you need standard designs or bespoke products, our expert team is committed to delivering solutions that meet your exact needs.

# TUG FENDERS

## Multiple Fender Types:

At Lion Rubber, we recognize that different tug operations require specific solutions to ensure optimal performance and safety. To this end, we offer a comprehensive range of fender shapes, including D, Cylindrical, W, and Keyhole designs. This diverse selection provides the flexibility needed to accommodate the unique requirements of various marine scenarios, allowing tugboats to navigate, dock, and tow with confidence. Each fender type is engineered for versatility, helping operators match the fender specifications to their operational challenges seamlessly.

## Durable and Weather-Resistant:

Our commitment to quality is evident in the materials we use for our fenders. Crafted from high-performance rubber compounds, Lion Rubber fenders are built to endure the harshest marine environments. With exceptional resistance to saltwater, ultraviolet (UV) radiation, and extreme weather conditions, these fenders are designed for longevity and reliability. When you choose our products, you can be assured of their durability, providing a dependable line of defense for your assets throughout their operational life.

## Superior Impact Absorption:

Safety is the cornerstone of any successful tug operation, which is why our fenders are designed with superior impact absorption capabilities. During towing and docking, our fenders effectively cushion and dissipate the forces involved, protecting not only the tugboats but also the surrounding infrastructure. This feature enables smoother operations, reducing the risk of damage and enhancing overall safety. With Lion Rubber fenders, you can trust that your operations will proceed without unnecessary interruptions, leading to greater efficiency and peace of mind.

### Impact Protection & Mooring Solutions:

Our **Bollards, Cleats, Fender Panels, Mooring Ropes,** and **Ladders** are engineered to offer safe and reliable docking solutions. Designed to withstand tough marine conditions, they ensure secure mooring and protect both vessels and docks from impact damage. Each product is crafted for superior durability, offering enhanced protection against

wear, harsh weather, and docking-related stresses. Whether you're in need of robust mooring points, impact absorption, or safe access between vessel and dock, our products deliver dependable performance, safeguarding your assets.

### Durable & Weather-Resistant

Constructed from high-quality, weather-resistant rubber, our dock accessories are built to

endure the harshest marine environments. The Ladders, Cleats, & Fender Panels provide long-lasting protection, minimizing maintenance needs while offering excellent resistance to UV rays, saltwater corrosion, & extreme weather conditions. Perfect for both commercial & recreational use, our products are engineered for longevity & reliability, ensuring they perform season after season with minimal upkeep.
